How Did it All Start?

The Coudersport Area Municipal Authority (CAMA) was in talks with JKLM and Epiphany Allegheny LLC to build a fracking waste facility, that would dump “clean” fracking water into the Allegheny River. As word got around, people became concerned with the serious consequences this would have caused. After many community members, from PA and NY, expressed their concerns, CAMA was swayed to deny the permits.

On April 9th, 2018 CAMA overturned the decision to build this facility, therefore giving us our **first** victory against the fracking, gas and oil industry.
